

*Deluxe Multifunctional  
Massage Chair*

*Royal*

# Royal

www.imedics.com.au

As the name suggests, the ROYAL is an advanced massage chair combining the very latest technologies, materials and finest leathers to provide you with an unbelievable massage experience fit for a King or Queen! With a high-powered vibration motor in the seat, the Royal helps activate the buttock and thigh muscles by stretching these areas helping to relieve muscle tension.

Feet and calves will never feel the same again with the unique air bag massaging system.

Equipped with twin heaters for both the soles of the feet and the sides of the waist, blood circulation is significantly improved in these areas.

Full function massages are available with the 6-wheel mechanism and include shiatsu, kneading, tapping, synchronisation and pummel.

These can be activated in the four automatic modes or alternatively can be used in manual modes for a more pinpoint massage to a specific area such as the neck or lower back.

Naturally the strength of the massage can be increased or decreased at the touch of a button.

The Royal also comes with stereo headphones and a USB flash that allows you to download your favourite CD or music track to the chair.

You can also plug in your Ipod or similar music device.

Full-synchronised "massage to music" is also available.

With an advanced LCD screen with body contour scanning and separate remote control, the Royal truly is massaging at its best.
